
Strategic Opportunity for a Startup or Venture Studio

Acquire & Commercialize the DataAI / DataAILite Platform

We are seeking a **startup, venture studio, or product-focused team** to take over and commercialize the full **DataAI / DataAILite** analytics platform.

This is a **code-complete, production-ready system**, designed for rapid adaptation, rebranding, and market deployment.

Try It First — Live & Downloadable

Interested teams can **explore and test the platform immediately**:

-  **DataAI.link** — access live demos and download executable builds
-  **DataAILite.com** — download the DataAILite executable site and test core functionality

These executables allow you to **evaluate the real product**, not mockups or prototypes.

After agreement, we provide:

-  **Complete source code**
 -  **Full ASP.NET frontend and backend**
 -  **JavaScript backend**
 -  **Deployment guidance and architecture overview**
-

What You'll Receive

Full access to the intellectual property and source code for:

- **DataAI** – Advanced AI-driven analytics, dashboards, reporting, and insight generation
- **DataAILite** – Lightweight, in memory, embeddable analytics engine for SaaS products, BI tools, and vertical solutions

Built for:

- Cloud or on-prem deployment
 - White-labeling and rebranding
 - Deep customization for your market
-

Partnership & Commercial Model

We are not seeking to operate or market the product ourselves.

Our goal is to **enable the right startup partner to own commercialization.**

Commercial terms include:

-  **Moderate upfront acquisition fee**
-  **Small ongoing royalty** per sale of the customized DataAI product
-  Full freedom to adapt, extend, and position the platform
-  Clear, transparent licensing terms

This structure keeps upfront risk low while enabling strong long-term upside.

Ideal Partner Profile

We're looking for teams that:

- Have **go-to-market strength** (SaaS, enterprise, or vertical markets)
 - Want to **accelerate time-to-market** without multi-year development
 - Understand **analytics, AI, BI, or data platforms**
 - Prefer ownership of a **mature, flexible codebase**
-

Why This Opportunity Stands Out

Building a comparable analytics and AI platform from scratch typically requires:

- Years of engineering effort
- Significant capital investment
- Specialized data and AI expertise

With DataAI, you can:

- Skip the heavy R&D phase
 - Launch faster
 - Focus on growth, customers, and differentiation
-

Let's Start the Conversation

If your startup or venture studio is interested in:

- Testing a **real, working analytics platform**
- Acquiring **full ASP.NET + JavaScript source code**
- Paying a **reasonable upfront fee**
- Sharing **small royalties tied to success**

We invite you to explore **DataAI.link** and **DataAILite.com**, then contact us to discuss demos, licensing, and next steps.
